FACT-BASED APP FOR KNOWLEDGE SHARING

Abstract.

Our project aimed at creating a unique social networking app centered around small, concise facts spanning various categories such as technology, science, etc. Users could contribute by posting facts up to 200 characters. Each fact was open for voting.

The development of “Today I Learned” was driven by a commitment to embrace innovation and utilize the latest technological advancements to address a common problem: information overload. Our aim was to cut through the noise and offer an efficient learning experience.

The “Today I Learned” app has been launched with compelling features that simplify the discovery and sharing of knowledge. Users can now easily categorize facts, allowing for a tailored educational experience. Our innovative emoji-based voting system invites interactive feedback on each fact shared. The mandatory inclusion of credible sources for every fact ensures the integrity of the information, providing users with a dependable educational resource.

Key words: *social networking app, knowledge sharing, information overload management, share knowledge experience.*

Study Program: Information Systems and Cyber Security

"Knowledge at Your Fingertips - Every Day, Every Discovery"

Today I Learned is an engaging platform for sharing and discovering concise facts across a variety of fields including technology, science, finance, and more. Users can contribute facts up to 200 characters, fostering a community of quick and easy learning. The app features a dynamic voting system with reactions and emphasizes sourcing, encouraging a responsible and informed exchange of information.

Quora Competitor

What makes us unique

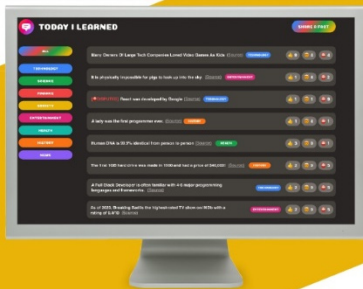

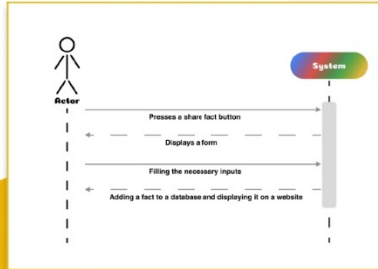

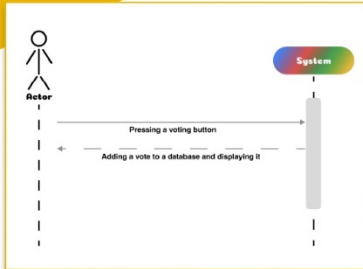

Concise Learning: Share and discover facts with a 200-character limit – perfect for quick reads and easy digestion.

Interactive Experience: React to each fact with a simple yet expressive emoji system - agree, disagree, or be blown away!

Community Driven: Be part of a community that values information and accuracy, with every fact backed by a source.
