NOXUSNOTES – A SECURE NOTE TAKING APP

Abstract.
NoxusNotes is an efficient note-taking application that can help users easily organize and manage their written notes. Not only does it provide users with a user-friendly and easy-to-understand way to create, edit, delete, save their notes, but also guarantees their safety, and confidentiality via encryption. Not to mention, also including the option to individually password lock certain notes, in the scenario of someone gaining access to your phone. We also have the functionality of code highlighting, making it easier for you to save the idea or concept for your programming needs. Market analysis has shown us that these two characteristics are missing in the market, so we hope to fulfill the needs of the security and programming minded.

Key words: *efficient, user-friendly, safety, encryption, programming.*
